With its expertise in liquid ink, Mitsubishi Pencil has developed a range of great rollerballs, incarnated by uni-ball eye, the reference of rollerballs for 30 years.

All rollerballs in the uni-ball liquid range are equipped with the uni-Flow system, which controls and promotes ink flow to the tip, ensuring continuous writing and instant restart of the stroke after use.

The range of Liquid Ink rollerballs are equipped with Super-ink technology that keeps the writings over time and ensure the professional and official documents.

Uni-ball rollerballs are available in a range of colors and are fully refillable. Uni-ball rollerballs are available in a range of sizes and are available in a range of colors. Uni-ball rollerballs are available in a range of sizes and are available in a range of colors. Uni-ball rollerballs are available in a range of sizes and are available in a range of colors.
